

## How to Put YouTube Clips into PowerPoint on a Mac

Have an idea, for example “what if Facebook was around when Jesus was born”. Here is what you need to do.

First make sure you have the following software:

- ClipGrab (clipgrab.org)
- iMovie (store.apple.com/ca/) and
- PowerPoint (store.apple.com/ca/).

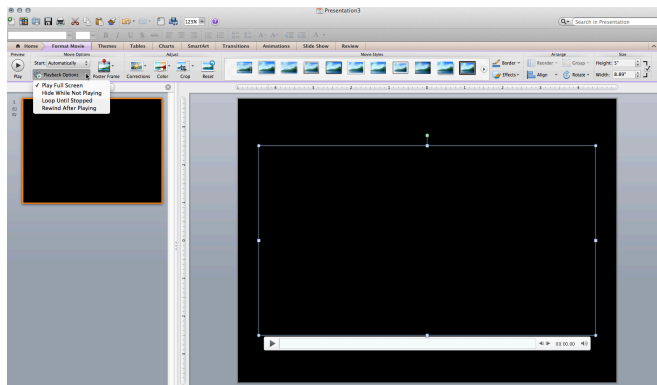

Use ClipGrab to do the search

Make sure the Format is set to MPEG4 and then select “Grab this clip!” and save it.

Now, only if you want to edit the clip because your sermon is already too long, import the saved “mp4” clip into iMovie and remove the parts you don’t need (it is not Epiphany yet, so remove the Twitter references to the Maji ‘Following’ the star).

In PowerPoint select ‘Movie from file’ under the ‘Insert’ menu. Then make sure the movie is set to play automatically and it is set to full screen mode.

That’s it.
